EDUCATION

Northeastern University - Silicon Valley Campus, San Jose, CA

Sept. 2025 - Expected Dec. 2027

MS in Computer Science, GPA: 4.00/4.00

Nankai University, Tianjin, China

Sept. 2015 - Jun. 2021

MS & BS in Public Administration, MS Outstanding Graduate

EXPERIENCE

Software Engineer Intern - Vouchify, a Professional Endorsement Platform

Jun. 2026 - Present

Key Skills: Python, FastAPI, SQLAlchemy, PostgreSQL, Alembic, Celery, Redis, Docker

Remote, US

- Established a **structured endorsement request lifecycle** by engineering a **backend workflow orchestration system** with automated state transitions, request deduplication, reminder scheduling, and expiration handling.
- Architected and implemented a **fine-grained authorization framework** for **secure profile sharing** with recipient-specific access, revocable share links, centralized visibility resolution, and live permission evaluation.
- Redesigned **attachment storage and delivery** by introducing a **storage abstraction layer** and authenticated download pipeline, eliminating direct public file access while enabling future cloud storage integration.

Software Engineer Intern - NxCode.ai

Mar. 2026 - May 2026

Key Skills: TypeScript, React, Node.js, SQLite, JWT

Remote, US

- Enabled seamless anonymous-to-user account migration by building an **authentication and progress synchronization system** with persistent progress tracking and session restoration.
- Simplified content authoring and reduced duplicated UI implementation across hundreds of concept and quiz pages by developing a **reusable rendering pipeline** for structured learning content.

President Office Coordinator - The First Affiliated Hospital, Zhejiang University

Aug. 2021 – Apr. 2024

- Assisting in a scheduling mobile App to reduce hospital exam wait time to < 2 days

Hangzhou, China

- Contributed to the hospital's digitalization plan by proposing healthcare software systems integration

PROJECTS

Urban Service Intelligence Platform

Apr. 2026 - May 2026

Key Skills: Python, Spring Boot, PostgreSQL, React, Docker

- Programmed an **operational analytics** and LLM-assisted **strategic decision platform** for SF service request data, enabling trend analysis, forecasting, geospatial analytics, risk assessment, and automated operational insights.
- Deployed the platform with a **cloud-native backend** on Render with PostgreSQL, using environment-based configuration and a reusable data refresh pipeline.

Full-Stack iOS Food Marketplace App

Jan. 2026 – Mar. 2026

Key Skills: Java, Spring Boot, MySQL, React Native

- Programmed App item prices by Engineering a **dynamic pricing tool** that automatically updates prices by analyzing item-level sales and operating from MySQL to reduce food waste and increase revenue.
- Built the iOS App with **modular backend** using service/repository layers, DTO validation, and pluggable provider interfaces to support payment processing, order lifecycle management, and pickup verification.

SKILLS

Programming & Software: Java, Python, TypeScript, JavaScript, C, REST APIs, JWT, assembly, Linux

Frameworks & Data: React, Node.js, PostgreSQL, MySQL, SQLAlchemy, Docker, AWS, Redis, Celery, Alembic

AWARDS

- Northeastern University Academic Excellence Scholarship, 2025
- Nankai University Outstanding Graduate, 2021
- Nankai University Merit Student, 2018
