EDUCATION

Northeastern University - Silicon Valley Campus, San Jose, CA

Sep 2025 - Present

MS in Computer Science, GPA: 4.00/4.00

Nankai University, Tianjin, China

Sep 2015 - Jun 2021

MS & BS in Public Administration

EXPERIENCE

NxCode.ai, remote, US

Mar 2026 - Present

Software Engineer Intern

- Developed Bibabo.ai, a gamified bite-sized learning app for AI coding, using visual explanations, animated examples, and quizzes for short study sessions.
- Implemented a **Node.js REST** backend module with structured API routes, **JWT** authentication, session restoration, persistent progress tracking, request validation, and centralized error handling to support authenticated progress sync and anonymous-to-user migration.
- Developed core **React/TypeScript/Vite** learning flows, implementing frontend features like multi-step term pages, interactive concept demos, quiz progression, level navigation, and progress-aware user workflows.

The First Affiliated Hospital, Zhejiang University, Hangzhou, China

Aug 2021 – Apr 2024

President's Office Coordinator,

- Built a medical exam scheduling system in hospital's mobile App using **JavaScript**, reducing wait time to < 2 days
- Contributed to the hospital's digitalization plan, focusing on healthcare software systems integration

PROJECTS

Urban Service Intelligence Platform with SQL

Apr 2026 - May 2026

- Built an end-to-end **data-driven backend system** using **Python, PostgreSQL, Spring Boot, React**, and **Docker** to process San Francisco 311 service request data and power analytics dashboards.
- Updated **REST APIs** for operational analytics, including service type rankings, neighborhood request volume, monthly trends, map-ready geospatial points, average resolution time, targeted simulation, and baseline forecasting.
- Deployed the system on **AWS with Amazon RDS PostgreSQL, AWS App Runner**, and **AWS Amplify**, using environment-based backend configuration and a reusable manual data refresh workflow.

Full-Stack Food Marketplace iOS App

Jan 2026 - Mar 2026

- Built a **Java/Spring Boot, MySQL**, and **React Native** marketplace covering listings, checkout, Stripe payments, pickup verification, reviews, and community features.
- Designed a modular backend with **Maven domain modules**, Controller-Service-Repository layers, DTO validation, and Provider interfaces; applied **OOD** patterns to support payment/storage abstraction, pickup code generation and verification, order lifecycle transitions, and cross-module business orchestration.

C-Based Compiler for A Custom Language

Oct 2025 - Dec 2025

- Built a **C compiler** for a custom language with lexical analysis, recursive-descent parsing, AST construction, stack-based IR, and x86-64 Linux code generation.
- Implemented **string literals**, built-in output functions, **dynamic allocation**, and typed array indexing for executable programs.

SKILLS

Programming & Software: Java, Python, TypeScript, JavaScript, C, SQL, REST APIs, JWT

Frameworks & Data: React/React Native, Node.js, PostgreSQL, MySQL, Docker, AWS, Vite

AWARDS

- Northeastern University Academic Excellence Scholarship, 2025
- Nankai University Outstanding Graduate, 2021 • Nankai University Merit Student, 2018
